Total No. of Questions : 8] [Total No. of Printed Pages : 4

Paper Code : 44913

BCA-201 N

Bachelor of Computer Application

(Semester Third) (Main/Back)

Examination, 2025-26

Object Oriented Programming Using JAVA

Time : Two Hours] *[Maximum Marks : 75*

Note : Attempt **all** the sections as per instructions.

Section-A

(Very Short Answer Type Questions)

Note : Attempt all **ten** questions. Each very short question carries **2** marks. Very short answer should not exceed **75** words. 10×2=20

https://www.pyqonline.com

1. (a) Define Object-Oriented Programming.

   (b) What are Java Tokens?

   (c) Differentiate between JDK and JVM.

   (d) What is the use of constructors in Java?

   (e) Explain the concept of method overloading.

   (f) What are abstract classes?

   (g) Define an interface in Java.

   (h) What is exception handling?

   (i) What is thread synchronization?

   (j) Explain the purpose of the File class in Java.

Section-B

(Short Answer Type Questions)

Note : Attempt any **two** questions. Each question carries **15** marks. Short answers should not exceed **200** words. 15×2=30

https://www.pyqonline.com

2. Explain the features of Java and how it differs from C++.

3. Discuss the concept of inheritance in Java with an example.

4. Describe various types of exceptions in Java and explain how they are handled using try, catch, and finally.

5. Write short notes on:

   (a) Wrapper Classes

   (b) Packages

   (c) Final Methods

Section-C

(Long Answer Type Questions)

Note : Attempt any **one** question. Each question carries **25** marks. Long answers should not exceed **800** words. 1×25=25

https://www.pyqonline.com

6. Explain in detail the concept of multithreading in Java. Discuss thread creation, life cycle, and thread priority with suitable code examples.

7. Describe the concept of Input/Output streams in Java. Explain the different classes used for byte and character stream handling with some examples.

8. What are interfaces in Java? Explain in detail how interfaces support multiple inheritance. Write a program to demonstrate the implementation of interfaces.
