Total No. of Questions : 8] [Total No. of Printed Pages : 4

Paper Code : 21323

F-423

B.C.A. (V Semester) Examination, 2025-26

(New Course)

Paper - BCA-503-N

Introduction to Internet Programming

Time : Three Hours] *[Maximum Marks : 70*

Note : Attempt any **five** questions. **All** questions carry **equal marks**. Symbols used have their usual meanings.

1. (a) What are the primary components of a Java application? Explain the role of each component in a simple program.

   (b) Explain the process of compiling and running a Java program. What is the importance of the Java byte code in ensuring platform independence?

https://www.pyqonline.com

2. (a) What are Java primitive and reference data types? Explain each category with suitable examples.

   (b) What are variable identifier naming rules and conventions in Java? Write a Java program to demonstrate the use of constants and variables.

3. (a) What is the difference between object references and primitive variables? How are they created and used?

   (b) Write a Java program to check whether a number entered by the user is even or odd using conditional constructs.

4. (a) What is a constructor? Explain its syntax, types, and purpose with a suitable example.

   (b) Explain the concepts of inheritance and abstract classes in Java. How is multiple inheritance implemented?

https://www.pyqonline.com

5. (a) Differentiate between method overloading and method overriding with suitable Java examples.

(b) What is encapsulation in object-oriented programming? Explain typecasting and promotion of expressions with examples.

6. (a) Explain different looping constructs in Java (for, while, do-while). What is a for-each loop, and when is it preferred?

(b) Define Graphical User Interface (GUI). Explain the Java A WT class hierarchy and describe how to create a simple GUI using Frame and Button components.

7. (a) What is the difference between client-side scripting and server-side scripting? Discuss their roles in web application development

https://www.pyqonline.com

(b) What is HTTP? Explain the process of reading an HTTP request and creating an HTTP response with an example.

8. Write short note on any **four** of the following :

(a) Java Virtual Machine (JVM)

(b) Application Programming Interface (API)

(c) Active X Controls

(d) Active Server Pages (ASP)

(e) The import statement in Java

(f) String class and its memory representation

https://www.pyqonline.com

B.C.A. (Fifth Semester)
Examination, 2023-24
(New Course)
Paper - BCA-503-N

Introduction To Internet Programming

Time : Three Hours] ***[Maximum Marks : 70***

Note : Attempt any **five** questions. **All** questions carry equal marks. Symbols used have their usual meanings.

1. (a) How Java programming language is different from C++ language.

   (b) What is Java byte code? Explain.

2. (a) Create a Java program to show simple arithmetic operations.

https://www.mjpruonline.com

   (b) Java program is compiled or interpreted or both? Justify your answer.

3. (a) Describe data types in Java language.

   (b) What is JVM? How it is different from JRE?

4. (a) What is JIT compiler in Java?

   (b) How Java is different from Java script.

   (c) How to print text in Java?

   (d) What is Java enum?

5 (a) How inheritance is useful in Java?

   (b) What are the different inheritance supported by Java.

   (c) Define the role of final keyword in Java.

   (d) Write the use of keyword super in Java.

6. (a) How garbage collection is done in Java?

   (b) Define AWT. Describe AWT package.

https://www.mjpruonline.com

7. (a) Define the following terms:-

(i) Active X

(ii) ASP

(iii) SNA

(b) What is Java JDBC?

8. Write in brief about any **four** of the following:-

(i) JDK

(ii) Java Applet

(iii) Copy constructor equals ( ) methods

(iv) Finalize keyword

(v) MAPI

(vi) Crypto API

(New Course)

Paper-BCA-503-N

INTRODUCTION TO INTERNET PROGRAMING

Time : Three Hours | | Maximum Marks : 70

Note : Attempt any **five** questions. **All** questions carry **equal marks**. Symbols **used have their** usual meanings.

1. (a) What are the characteristics of Java programming language? Explain with example.

   (b) What are the desired components of primary applications? Describe.

2. (a) What are the data types used in Internet applications of Java language? Explain.

P.T.O.

   (b) Write all the steps for displaying table of a number.

3. (a) How primitives and constants are stored in memory? Describe with example.

   (b) Describe string reference variables for storing strings in memory.

4. (a) What is method overloading? Explain its types with example.

   (b) Describe type casting with proper example.

5. (a) What are different types of operators? Explain.

   (b) Write a program in Java for generating fibonacci series using for loop.

6. (a) What do you understand by Association and life time of a variable? Explain with proper example.

   (b) Write steps for creating panels and complex layouts.

7. (a) What is constructor? Describe its various types.

(b) What is HTTP? Create & Explain an HTTP response with example.

8. Explain any **two** of the following :

(a) System Network Architecture (SNA)

(b) License Service API

(c) Client-side Scripting

(d) While-loop & Do-While loop.

(e) Grouping classes in packages.

Paper-BCA-503-N

INTRODUCTION TO INTERNET PROGRAMING

Time : Three Hours] *[Maximum Marks : 70*

Note : Attempt any five questions. All questions carry equal marks. Symbols used have their usual meanings.

1. (a) What are cookies and session objects? Where do we use them?

   (b) Differentiate between AWT and Swing components.

2. (a) Differentiate between Application and Applet.

https://www.mjpruonline.com

https://www.mjpruonline.com

   (b) What is a constructor and what is it used for? What statements can a constructor contain? What is its return type?

3. (a) Explain switch-case statement with example. What restrictions are placed on the values of each case of a switch statement?

   (b) Explain following terms:

   (i) extends

   (ii) synchronized

   (iii) protected

   (iv) implements

4. (a) Write an Applet showing the sequence of method executed during the life cycle of an applet.

   (b) What does Application programming interface mean? Explain few Application programming interface packages.

https://www.mjpruonline.com

https://www.mjpruonline.com

5. What is String in Java? Explain any three constructors of String class. Write a program in Java to find length of a given string and display the string in upper case.

6. (a) Explain Active X.

   (b) What is client-side scripting and server-side scripting in Java?

7. (a) What are interfaces in Java? What do you understand by 'implementing interfaces'? Explain with the help of an example.

   (b) Differentiate between overloading and overriding. Giving examples.

8. Explain following terms with reference to Java:

   (i) Import

   (ii) Classpath

   (iii) Inheritance

   (iv) Event

B.C.A. (Vth Semester) Examination, 2019–20

(New Course)

INTRODUCTION TO INTERNET PROGRAMMING

Paper–BCA–503–N

Time : 3 Hours] [Maximum Marks : 70

Note :– Attempt any *five* questions. All questions carry equal marks i.e. **14** marks. Symbols used have their usual meanings.

1. (a) What do you mean by "Byte-Code" in Java ? Define JVM and its role.

   (b) Write down the steps required to write, save and running a Java program.

2. (a) Java is a Compiled *or* Interpreted language *or* both. Justify your answer.

http://www.mjpruonline.com

http://www.mjpruonline.com

   (b) How Java programs are different form C++ programs in structure ?

3. (a) Write a program in Java to display a "Hello-message".

   (b) Define the terms :

   (i) AWT

   (ii) Applet

4. (a) Differentiate constructor and destructor.

   (b) Explain "Java-methods".

5. (a) Write a Java-program to find whether a user defined number is prime or not.

   (b) Write a program in Java to check whether a number input by programmer is an Armstrong number or not.

6. (a) What are the elements of graphic user interface development ?

   (b) What are "Asps" ?

http://www.mjpruonline.com

http://www.mjpruonline.com

7. (a) Describe Active X design time controls.

   (b) Explain systems network architecture.

8. Write short notes on the following : (any *four*)

   (i) Servlet Vs Applet

   (ii) Encapsulation

   (iii) MAPI

   (iv) HTTP Vs. HTTPs

   (v) Typecasting

B.C.A. (Fifth Semester) Examination, 2018

(New Course)

Paper–BCA–503–N

INTRODUCTION TO INTERNET PROGRAMING

Time : 3 Hours] [Maximum Marks : 70

Note :– Attempt any *five* questions. All questions carry equal marks. Symbols used have their usual meanings.

1. (a) What is Java Class ? What do you understand by Access Specifier ? Explain.

   (b) Explain Looping in Java ? Also explain its types.

2. (a) How is multiple inheritances achieved in Java ? Explain with suitable example.

   (b) Explain String Buffer Class with the help of an example.

http://www.mjpruonline.com

http://www.mjpruonline.com

3. (a) Differentiate overloading and overriding. Explain with suitable example.

   (b) What is constructor in Java ? Explain with suitable example.

4. (a) Draw the inheritance hierarchy for the frame and component classes in AWT.

   (b) What do you understand by API, MAPI and SNA APIs ?

5. (a) How do we define interfaces in Java ? Explain with the help of an example.

   (b) Write a Java program for swapping two numbers ? http://www.mjpruonline.com

6. (a) What are Java Package and which package is imported by default ?

   (b) What is the main difference between an application and an applet ?

7. (a) What is an advantage of creating Active X Controls ? Explain.

   (b) Explain Java primitive type and reference type.

http://www.mjpruonline.com

http://www.mjpruonline.com

8. Write short notes on the following :

   (a) ASP

   (b) String Class

   (c) Abstract Class

   (d) Telephony API.
