(New Course)

Paper - BCA-504

SOFTWARE ENGINEERING

Time : Three Hours] *[Maximum Marks : 70*

Note : Attempt any **five** questions. **All** questions carry equal marks. Symbols used have their usual meanings.

1. What is SRS? Explain the benefits of SRS. Develop SRS for Payroll Management System. Follow IEEE SRS format.

2. (a) Briefly explain any two problems related to software development.

(b) Explain the different categories of software maintenance.

3. (a) What is function oriented design? Explain its main element and features.

(b) What is software testing? Explain the need of system testing. Also describe the process of system testing.

4. (a) What is waterfall model? Explain whether this model is suitable for developing a Railway Reservation System or not.

(b) Explain the importance of DFD. Draw various symbols of DFD with the significance of each.

5. (a) What is meant by software testing? Explain black box and white box testing.

(b) What is software engineering? What is software crisis? How can it be managed?

6. (a) Differentiate between process and product. Which one is more important and why?

   (b) Define 4GL's. Discuss how 4GL's help to solve the complex problem. Also list its limitations.

7. (a) Define CASE tools. List four broad categories of them and briefly explain any two of them.

   (b) Draw PERT chart for the development of an "Online Student Admission System".

8. Write short notes on the following.

   (a) Prototyping model

   (b) Regression testing

   (c) Data Abstraction

   (d) Maintainability and Reusability.
